

# Com/Net/J-Root Constellation

Where it all comes together:

# VeriSign “Regional Internet Resolution Sites”

- VeriSign is actively deploying new .com/.net/J root resolution sites
  - Anycast instance of .com, .net, and the root zone
  - VeriSign furnishes the equipment
  - Requirements
    - 8U of rack space
    - Connectivity
      - Transit to our site (for data pushes and monitoring)
    - Power
- Benefits of service:
  - Better service/faster response time for .com, .net and root DNS requests for those who peer at the IX
  - Better local resiliency in the event of a global attack against .com/.net infrastructure
- Whom to contact if interested
  - Mark Kusters (mkusters@verisign.com)
  - Brad Verd (bverd@verisign.com)
