NCC Test Traffic update
What happened between Q4 '06/Q1 '07

Ruben van Staveren <ruben@ripe.net>

NCC Test Traffic update

- Little introduction

- I'm Ruben van Staveren

- Started working on TTM at NP in August 2002

- Nowadays with the Information Services Group

NCC Test Traffic update

- Improvements in data processing performance
  - New server hardware
  - Upgrade of toolkits used (no more "back porting")
  - Refactoring of software
- Overall performance gain: 200% - 400%
  - Ready for growth

NCC Test Traffic update

- **New deployments in South America and Russia**
  - São Paulo, 2nd install underway in Brasilia
  - Samara, needs to be finalised, 2nd install underway in Moscow
- **Getting back to the United States**
 - ISC, Redwood, near Palo Alto IX
  - T-Systems, New York
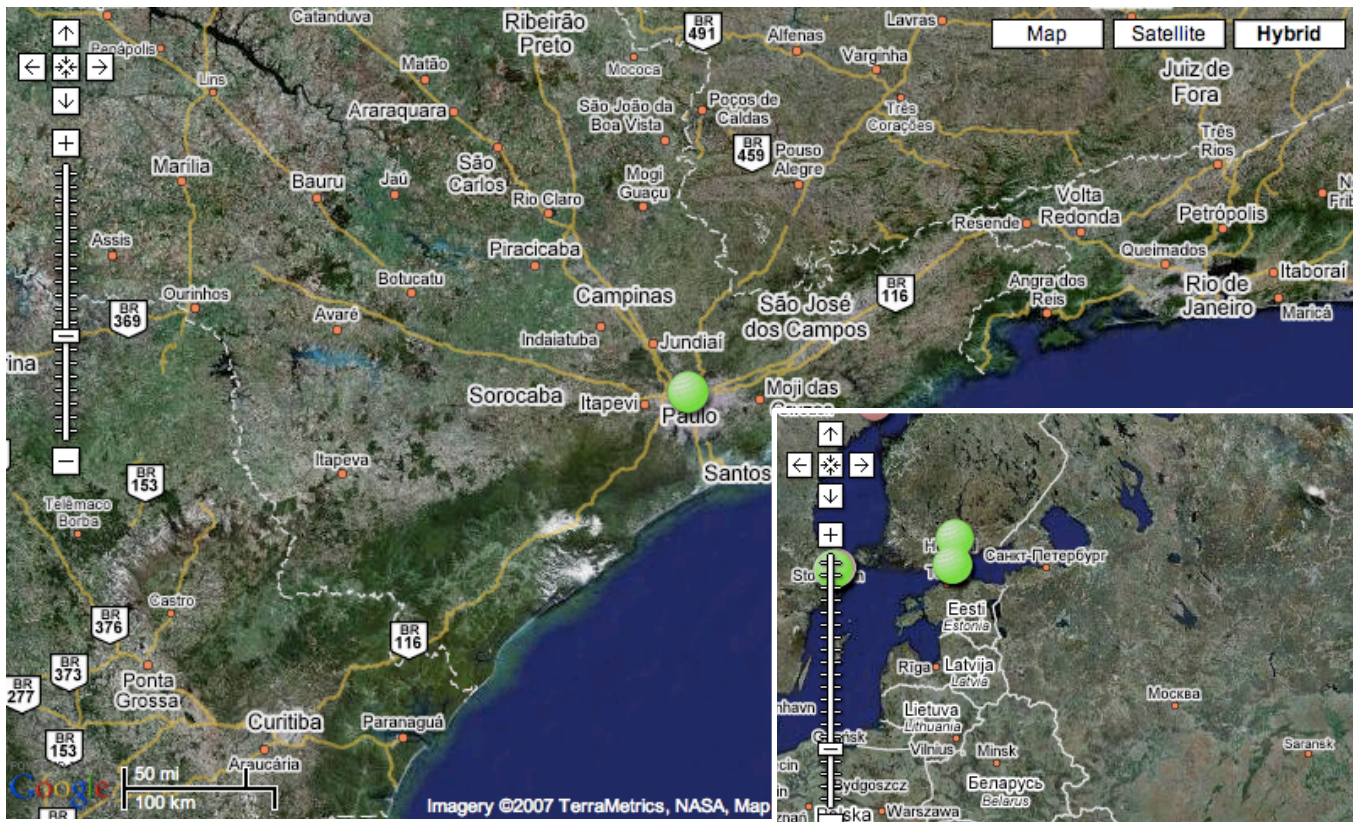

NCC Test Traffic update

- Where are they....

NCC Test Traffic update

NCC Test Traffic update

TT142, São Paulo, BR

TT143, Samara, RU
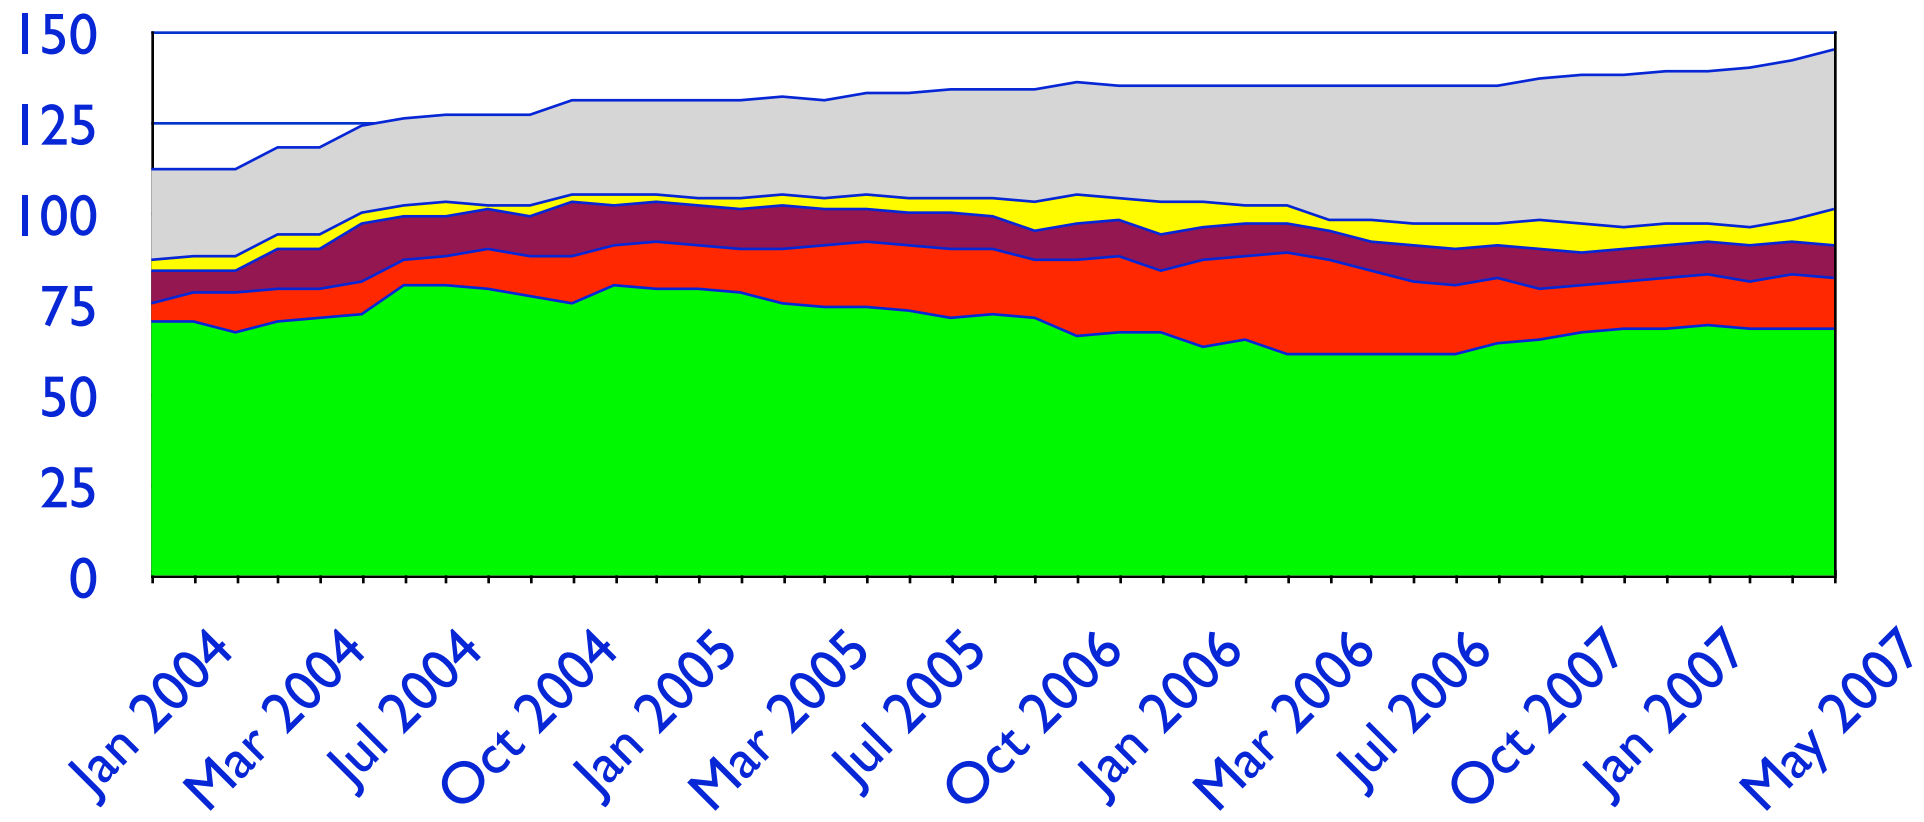

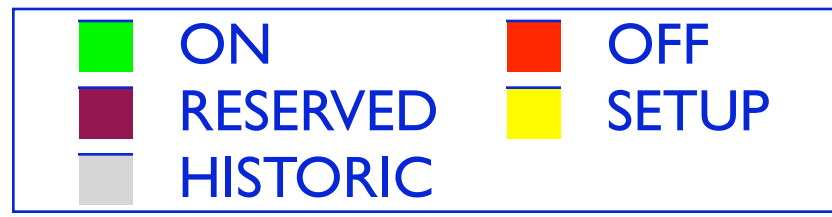

NCC Test Traffic update

- Continuity
  - Source code, reorganised for development and maintenance
  - Antennas, successor is drop in replacement.
    - 1/4th of its size.
  - Trying out other visualisations like Google maps
 - ASN32 ready (but no tb's in 4-byte ASN's yet)

NCC Test Traffic update

- ## History 2004 - Present
